

# Omission

## Twofold

Omit myself  
(Take myself from your eyes)  
Omit myself as a flavour for God  
(All my rights are everyone's enemy)  
Suffer fate 'cause it's the only lift you've got  
Dedicating all of before to now  
Emphasizing these things you wont allow  
Never now we need the other  
(Centralize the force of rot)  
In your life we take our cover  
(Echoing what is not)  
Going nowhere  
(Take myself from your eyes)  
Going nowhere's the only clear shot  
(All my rights are everyone's enemy)  
At being somewhere the fates think you're not  
Somewhere's hole to divides any way you want  
Faking now faking who you are  
Never now we need the other  
(Centralize the force of rot)  
In your life it'll take my cover  
(Echoing what is not)  
Never now I need the other  
(And if you're suffering a lot)  
In your life we take our cover  
(Try being someone you're not)
