# T Bone

## The Rakes

Shoot to kill, I dropped a pill
Then I threw a bottle of drink down my throat
I went at first looking for assistance
T bone burst in with both guns blazingT bone, clear out the tillMother spilled her veils and her baby's milk
When I walk past in my balaclava
Stepping through glass and past a cadaver
Up to the counter, I could smell the sulfurHoney, it makes me feel ill
T bone, clear out the tillI took two hills with both rifles empty
I ran for miles when T bone went to town
As he ran around, the people had their hands up
All that he found was his next victimHoney, it makes me feel ill
T bone, clear out the till
T bone, T bone, T bone
