Relief

Chiwawa

Flash flood, you got too comfortable
So I showed you, who's really in control
You gave all of your savings to the poor
Lightning on the river and you're shivering
With your fishing pole
Same night you bought a ring and you proposed
You never really know what you can't really see
I'll be fair, I'll be fair
You made it out alive, oh what a relief
I'll be fair, I'll be fair
Earthquake in your pajamas
Huddled in doorways while your houses sway
Blue blood, pumping like a hunter's fist

I'd love the shape your faces make
Oh my, thank you for keeping me safe
Even thou you know it don't always go that way
You never really know what you can't really see
I'll be there, I'll be there
You made it out alive, oh what a relief
I'll be there, I'll be there
Everything will be explained
Your wild guess, everything will be explained
Go ahead, everything will be explained
Your wild guess, everything will be explained
