

Hellrider - Live

Judas Priest

here they come
these gods of steel
megatron
devouring what's concealed speed of death
crossfired they stare
final breath
from vaporizing glares raised to man oppressed
sign of persecution hellrider
roars on through the night
hellrider
raised for the fight
all incensed to overthrow
strong defence
with armaments they grow
by this quest
their fates renowned
put to rest
abominations crown time to ram it down
judgement for the tyrant hellrider
roars through the night
hellrider
raised for the fight fight undying and eternal
wheels bring death and
pain infernal
honour bound in strength repleated
to no end they're undefeated
hellrider, hellrider
you fought their battle for them hell rider, hellrider
you bought them through their despair hellrider, hellrider
your tempered steel relinquished hellrider, hellrider
you slaught them all extinguished wrath of doom
in killing fields
they consume
for valiants never yield triumph to the gods
vanquished of enslavers hellrider
breaking their will
hellrider
in for the kill hellrider, hellrider
you fought their battle for them

hellrider, hellrider
you brought them through it all
hellrider
