

Good Winter

Rah Rah

Sometimes I never done before
We made up and start drinking
Raking was a chore
And darling, I don't intend to live in the past
And I'm hoping this nostalgia will eventually pass

It's the same house with memories
It just last
It just last
It just last

That was a good winter
That was a good winter

We use to go skating every other day
Slap and talk cheddar
I was the floor, you were monsieur
The way we'd all huddle close in the barge
Stayed till closing
Think about back the cars

And darling, ain't it crazy just how fast
The moment till your life become your past

It's the same house with memories
It just last
It just last
It just last

That was a good winter
That was a good winter
