

# Don't Run to Wait

LIVE

I had a feeling we were close from the beginning  
No longer betting the chance is great  
We can't be sorry for steps that we were taking  
You found the and you're always leaving You thought the night was such a seminal connection  
You should be nervous the mask is great  
At hiding everyone, faceless but revealing  
You found the and you're always leaving,  
Always leaving Don't run to wait  
Don't shy away  
Now that you need it, it's all right in your face  
You know that you want it, so don't shy away  
Beg tonight  
'Cause everything, all takes a manner to know your goodbyes  
On your knees  
Waiting, all your lies  
Always leaving
