## Mew

So they went to their car  
I was lost in the crowd when I  
Tried to find my way  
Nothing else seemed to matter back then  
Soft encounter  
You amplify my emotion  
No devotion  
May sound wrong but is sounder And I know you have nothing to say  
When you look like you did then  
There's no point in playing along  
Is there now? So they went to their car  
I was lost in the crowd when I  
Tried to find my way  
Nothing else seemed to matter back then Last encounter  
A goodbye kiss from an old friend  
Can't stay long now  
My train is headed for somewhere else When you're gone I envy the people you're with  
Cause they're with you  
Nothing's wrong  
I've just been here too long to pretend Feeling so small  
You stretch out beyond me  
There comes a time when all I'm feeling  
Everything belongs to you  
I was counting on you then  
Close your eyes and think of when So they gazed at the stars  
And he told her his real name  
Said it wasn't far
