You Let Me Go

Toxic Lab Rats

Na na na na na na nana
Reached for the sky the moment we met
No hesitation
I will never forget
Got a sign and I waited for more
You eyes, your lips so sore

I was nothing
I was not of your kind
The things you whispered well they made my go blind
Got no signs but I waited for more
Didn't see you closing the door

Desperation
No hope no cure no nothing to save my soul
Annihilated
Nothing left I had no choice and you let me go

Still searching for your eyes in the crowd
Keep forgetting about the first thing I vowed
Never to think about your pretty face
Still each day I'm lost in a maze
No answers as I'm breaking the walls
My eyes still covered and the beer bottle calls
For one second I thought you were mine
But you took me to the end of the line

Desperation
No hope no cure no nothing to save my soul
Annihilated
Nothing left I had no choice and you let me go

I thought the things we had was
Na na na na na na nana

Degenerated â€“ a creep with one thought
To get rid of the sickness I caught
No more questions no more answers to fear
Got to cure things with whiskey and beer

Reached for the sky the moment we met
No hesitation I will never forget
Got a sign and I waited for more
Didn't see you closing the door

Desperation
No hope no cure no nothing to save my soul
Annihilated
Nothing left I had no choice and you let me go
