

The Weekend

Steve Wariner

Couple of days isn't a very long time
Why can't I just walk away, I used to be good at goodbyes
And out on the water, under the stars
I let the moonlight play a trick on my heart You had some fun for the weekend
But I'll be in love for the rest of my life
You took me out to the deep end
And I fell right over, I didn't think twice I finally got something worth keeping
And if I can't have you tonight
Least I had the weekend The radio plays the sound of the waves rolling in
The smell of the night sure can get under your skin
Just for a moment I held you too close
Now I'm all out of time and I don't want to let go You had some fun for the weekend
But I'll be in love for the rest of my life
You took me out to the deep end
And I fell right over, I didn't think twice I finally got something worth keeping
And if I can't have you tonight
At least I had the weekend How much can happen in a night or two?
I guess it's all depending on your point of view You had some fun for the weekend, girl
But I'll be in love for the rest of my life
You took me out to the deep end
And I fell right over I didn't think twice I finally got something worth keeping
And if I can't have you tonight
At least I had the weekend Girl, I'll be in love for the rest of my life
You took me out to the deep end
I fell right over I didn't think twice
