

# Immortal Lives Young

## Firewind

Falling down is a child's next move  
Learning how not to fall is life's pursuit  
And the conflict grows All we need is a guiding host  
Time, the thief steals away  
Dreams and hopes  
For a virtuous world God and evil, stalks all the young  
Pray your choices, kingdom come Impulsive the youth  
It drives them to prove they know what's better  
But you know the truth  
The wisdom is proof it comes much later And the conflict, it grows  
Never comes to a close When you were young  
Did you learn from the tales you heard  
Were you impressed  
As to take them to heart When you were young  
Did you feel as did everyone  
You stand as immortal When you were grown  
Did you learn from the tales you heard  
Nothing appears as it did as when young  
Where you are grown And you know that it all was wrong  
You stand there as mortal  
You are now a mortal  
You are now a mortal Falling down, is a pain that's earned  
Knowing now, it was all lessons learned  
For a virtuous world God and evil, stalks all the young  
Pray your choices, kingdom come  
God or evil, claims everyone  
No more chances, for now you're gone Immortal lives young, the conflict goes on  
Mortals they learn, the conflict goes on  
Immortal lives young
