

Blacklisted

Stormy

Always inside, dreaming awake,
My mind seems to be fake
In time, so many reason to give up
We are the army of those who refuse to die!
To die and look like anybody else
To cry and talk like we we're someone else
To fry and be happy to look like everyone else
We live our lives as we were dead!Blacklisted to your pussy eyes
Judgement is just the easy way out
We're all same except for this
I do what I wish and you're a slave
Back into line when we're back into life
Sad story, fix all this shit away
Forced and betrayed we chose our way
Marginality leads us to beware
Keep talking until you'll be awareWe are the ones who live under our laws
Forced and disgust by fucking closed soulsIs that all that we deserve?
ah! ah! fucking dumb we don't need you to be numb
You'll be on the throne for all the tortured souls
Now apologize, excuses,
Will not be able to fucking beat it anymoreToo much pain endured this century
Too much time has passed for you and me
It hardly fade, finally we can see
The only way is to fuck off the society!
Break the neck of the intolerants
Shit the face to all the fucking minions
Knife your ass, for all the bullshit said
Violence never be idle 'til is just wordsGuys join army of dead
Come on, don't be shy
Let everybody in
No more chance to be up againSad story, fix all this shit away
Forced and betrayed we chose our way
Marginality leads us to beware
Keep talking until you'll be awareWe'll never be in, fine
Here is our paradise
We stand each other
there is no compromise
We'll never be in, fine
Here there is no disguise

Let the other coward find their way to die
The war is over faget!
Why don't you stop, don't you get?
We're not fighting anymore!
Why are you begging for more?
Ain't it enough? Wanna play?
You're gonna hear what we say!
We're not fighting, we're not incur,
We're not begin anymore
Sad story, fix all this shit away
Forced and betrayed we chose our way
Marginality leads us to beware
Keep talking until you'll be aware
Sad story, fix all this shit away
Forced and betrayed we chose our way
Marginality leads us to beware
Keep talking until you'll be aware
We are the ones who live under our laws
Forced and disgust by fucking closed souls
That's all that we can say
The things are just that way
You're afraid and you may
Just fucking throw us away
Too many in world,
No room available
So stay inside your mind
And give your fears to others
So we are on our road
And we follow our heart
Just living with the art
And leaving with the art
And never say goodbye
Now we're on our way to die!
