Dissolve And Decay

Hawthorne Heights

She wore crushed velvet Jet black and to the floor She rode on angel's wings That used to shine, oh so brightNow the dark has caught the spark In her eyes and I I can't find the air I'll wait for you, I cross my heartDissolve and decay There's nothing left for me (Right now) Walk slowly towards the light She's calling and I'm falling down She's crying and I am lying about last night She can't find a way to tell me, I can't find the air I'll wait for you, I cross my heartDissolve and decay There's nothing left for me (Right now)This fires dying down There's nothing left to take (Right now)(Right now) Dissolve and decay There's nothing left for me Sit back and let her die slowly Don't cry, she didn't love you anywayDissolve and decay There's nothing left for me Just try to make it out alive, yeah Alive means your blood is flowing(Now, right now) Dissolve and decay There's nothing left for me (Right now) This fire's dying down

Lyrics provided by https://damnlyrics.com/

There's nothing left to take (Right now)
