

Nobody Else

Atomic Rooster

Before I met you, I was so alone
Now I feel that I have found a home
You sparked the flame and you stoked the fire
of my heart's desire
my heart's desire You swept away my fear and my doubt
Now you're someone I can't do without
You are the only one who could inspire
my heart's desire
my heart's desire Nobody else in this world is so real
Nobody knows where I'd rather be
Nobody, nobody no one else but you You're acceptance has made me whole
Nourish my spirit and soothe my soul
You've given everything I require
my heart's desire Not just a lover but my best friend
So happy to take all the love that you send
Feel so good to let our love take us higher
to our heart's desire
our heart's desire Nobody else in this world is so real
Nobody knows where I'd rather be
Nobody, nobody no one else but you
