

# Even If

Lewis Watson

Doesn't seem that selfish, no, not in the least  
What's so self righteous about this curiosity?  
This want for a meager exchange  
So much time has passed but still it remains  
This need for you is a recurring theme in my life  
Don't you think I'm lonely?  
Eager to complete the story  
Confused and still haunted  
With why you'd start over  
Oh and ignore me  
It takes time to realize the other side of you  
That's controlled and blinding on sight of our lives  
Well even if you left me and my brother  
Even if you left us and our mother  
I want nothing more than to catch your eye  
Would you be impressed with how far I've climbed  
Without your assistance with you nowhere in sight?  
Don't you think I'm lonely?  
Eager to complete the story  
Confused and still haunted  
With why you'd start over  
Oh and ignore us  
It takes time to realize the other side of you  
That's controlled and blinding on sight of our lives  
Even if you left me and my brother  
Even if you left us and our mother  
She's had her share more than we'll know  
My brother won't, he just won't let go  
They say you're sick and there's a name and a phrase  
To apply and help explain  
Still having trouble trying to separate  
How you started a new family?  
Even after you left me and my brother  
Even after you left us and our mother
