

Talk Is Cheap And I've Got Expensive Taste

Search The City

You've got some nerve
And I'm a nervous wreck
And you're scared to death
These are fighting words
I'm getting off my chest.
God bless you and your secrets
You've got a way with words
But you really need to hear this.

If things were better with out me ever
Knowing the truth
These nights will suffer
So long forever
I hope everything works out for you

Better the devil you know
Than the devil that you don't
You said it with such a straight face..
The kind I'd like to break?

If things were better with out me ever
Knowing the truth
These nights will suffer
So long forever
I hope everything works out for you

Hey, I'm onto you
They say you've got a way with words
But I can say a thing or..

First of all I know you're a liar
Already burnt that bridge over the water
So let's get the story straight
Here's your last chance
Your lies can't hide your shaking nervous hands

I've saved the best shots I've got for you..
This is my best shot.
(Don't Move)

If things were better with out me ever
Knowing the truth
These nights will suffer
So long forever
I hope everything works out for you

If things were better with out me ever
Knowing the truth
These nights will suffer
So long forever
I hope everything works out for you

Hope everything works out for you..
Hope everything works out for you
Hope everything works out for you

Hope everything works out for you
