

# Cold Condition

## Edison Glass

This one thing's for certain  
We all need change  
We wrap ourselves in blankets  
To stay warm Well, it's still stinging  
I can't feel my toes  
Growing numb, I've come undone  
I can't keep out the cold I don't want to shiver anymore  
Or be alone We need warmth to come  
In our cold condition we need you to visit us  
Warmth to come  
The fire from inside to burn out all our lives Let's sew our hearts together  
Love will be our thread  
We'll dance again with no reason  
And no inhibition And in this moment we become alive  
We'll dance again with no reason  
And no inhibition Warmth to come  
In our cold condition we need you to visit us  
Warmth to come  
The fire from inside to burn out all our lives I'll wait for you here  
I wanna breathe and then let it go  
There must be more here than we know We need warmth to come  
In our cold condition we need you to visit We need warmth to come  
In our cold condition we need you to visit us  
Warmth to come  
Fire from inside to burn out all our lives
