Deep

Nine Inch Nails

Blank stare, disrepair, there's a big black hole
Gonna eat me up someday, someday fades away
Like a memory or a place that you'd rather be
Some place lost in space, Itch in my head
That's telling me somewhere, somewhere out there
Anywhere, I don't care, get me out of here
If I could feel all the pins and the pricks
If you were real, I could pick what's apart
And put it back together
This will come true, help me get through into you
Deep, deep, deep, deep, deep, deep, deep, deep
All I can do, driving me through into you
Deep, deep, deep, deep, deep, deep, deep, deep
One track, get you on your back, your skin speaks soft
But your lips couldn't say it, right now you know somehow
We could take a chance and we could make it, make it
Right here, make it all disappear

Everything we've been missing, missing
You make me feel, there's a part of me
That I want to get back again
Make this come true, help me get through into you
Deep, deep, deep, deep, deep, deep, deep, deep
All I can do, pushing it through into you
Deep, deep, deep, deep, deep, deep, deep, deep
Into you, into you, into you
All I can do, driving on through into you
Deep, deep, deep, deep, deep, deep, deep, deep
You're slipping through, I come in two into you
Deep, deep, deep, deep, deep, deep
We could become two into one
Leave this behind over and done
Everything new, I'm getting through
Into you, into you, into you
