

# Strung Out

Lecrae

How could I love you when all you ever did was wrong?  
How could I trust you? You lied to me all along  
You strung me out I'm going through withdrawals, the shakes and all  
You did me dirty, I almost died, dawg  
I let you play me and plus you gave me  
All the filthy things I wanted, all my sinful cravings But I see you, yeah you're see-through  
Somebody opened up my eyes and I don't need you  
I gotta leave you before you take my life  
I used to date you then I went ahead and made you wifey Yeah, you had me feenin' for the stuff you offer  
You such a scoffer, I know you want me in my coffin  
But girl you already lost it, your ways are perished  
Thank you God for Your salvation, this is what I cherish How could I love you when all you ever did was wrong?  
How could I trust you? You lied to me all along  
You strung me out You strung me out  
You strung me out, you strung me out  
You strung me out, you strung me out  
You strung me out, you strung me out Uh, I'm out your grip, I'm out your grasp  
You had me mesmerized, you had me in your hands  
Lust of the eyes, the pride of life  
You offered me the world, you made it look so nice You took me high, but left me down and out  
I run right back to you thinkin' that you would help me out  
You never satisfy, you only gratify  
You're just a bad illusion to every passerby And I don't want you 'round, you only bring me down  
So glad I quit you I don't miss you 'cause you had me down  
So get gone, get gone So get gone, get gone  
So get gone, get gone, so get gone, get gone  
So get gone, get gone, so get gone, get gone  
So get gone, get gone How could I love you when all you ever did was wrong?  
How could I trust you? You lied to me all along  
You strung me out You strung me out  
You strung me out, you strung me out  
You strung me out, you strung me out  
You strung me out, you strung me out Do not love the world or the things in the world  
If anybody loves the world, the love of God is not in 'em  
The world's passing away along with its desires but Whoever does the will of God will live forever  
I know it hurts sometimes  
We've got to go through withdrawal  
'Cause we've been strung out How could I love you when all you ever did was wrong?  
How could I trust you? You lied to me all along

You strung me out You strung me out  
You strung me out, you strung me out  
You strung me out, you strung me out  
You strung me out, you strung me out
