I've Got A Feeling

Sing It Loud

I've got a feeling you don't care
And everything I say you cannot hear
So celebrate the time we have cause I don't think I can stay
For too long
Oh yea, and how could I forget
The complications you have failed to comprehend?
I know I know you're wasting time
You're wasting time on me
Now I can SeeTell me do you still have pieces of me
Cause I'm not complete at all
We can try, we can try but we're never gonna get it right
Unless we fallAnd now that all is said and done
I guess it's time to turn our backs and run
Away so I can finally take the break that I deserve
Then while we're at it we can slowly build this bridge
And burn it to the ground in a matter of 10 seconds
She said, "we gotta get around baby" she said
You're wasting time on me
Now I can seeTell me do you still have pieces of me
Cause I'm not complete at all
We can try, we can try but we're never gonna get it right
Unless we fallIt's time to replace
All the times we've had cause they're never coming back
We've got to erase
I know the cause was cleaver but I should've known better
It's time to replace
All the times we've had cause they're never coming back
We've got to erase
I know the cause was cleaver but I should've known betterTell me do you still have pieces of me
Cause I'm not complete at all
We can try, we can try but we're never gonna get it right
Unless we fall
Tell me do you still have pieces of me
Cause I'm not complete at all
We can try, we can try but we're never gonna get it right
Unless we fail
