

Fire

Ladytron

A red cell
A perfect view out of the Novotel
Sat gently listening to
This song
It started over again
And the girl gets higher
The room's on fire
If you want her let it go
Hello
The sun went in
And it started over again
Linking an
Encyclopedia of nothing
In half-written signatures
And false names
It started over again
And the girl gets higher
The room's on fire
If you want her let it go
Hello
The lights went out
And it started over again
A red cell
A perfect view out of the Novotel
Sat gently listening to
This song
It started over again
And the girl gets higher
The room's on fire
If you want her let it go
Hello
The sun went in
And it started over again
