

Neighbour

Mother Mother

I am your neighbor, I can see you
I got these blinds that I peek through
And when you're crying I see your tears fall down
They're making oceans that in I sink and drown I feel I know you, I feel I know you well
I've seen you go through, I've seen you go through hell
I was there when you first let euphoria spill on your bed sheets
I could feel what you felt Do you feel used?
Well, I would too, I would too
And would you use me like I did you?
Oh, you would too? I am your neighbor, I can hear you
I got this tin can with a string through
And when you're crying, I hear your shakin' breath
And when you're lying, I hear your heart confess Time's slipping away
'Cause I see your moving signs everyday
You got your things in your boxes, your oven's always cold
You'll leave me all alone with just an empty peep hole Do you feel used?
Well, I would too, I would too
And would you use me like I did you?
Oh, you would too?
