

# Scent of a Woman

## Secret Sphere

In my lonely nights,  
My mind's mesmerized,  
By this wake of scent  
That I can't do, anything but to follow,  
I can't resistStep by step I'm sure  
To feel your breath is coming near  
I know you're not only a vision,  
But I'm lonely and the blame is on youScent of woman on meFaces everywhere,  
I detect the scent again  
I look around, where are you?  
My dream, surround me,  
I'm lonely, I feel I need you
