Good Times

Finger Eleven

Advisory - the following lyrics contain explicit language:

Something has stuck in
Underneath my skin
Eyes all looking in
For something within
Somewhere in hereNow, everything I say
Gives this all away
Senses deadened again
Nothing lives today
Not in here
Here in your headCareful, what youre feeling on the inside
You should try to remember
The good times and the high life
Are you feeling alright?Felt that I belonged
And now I feel that gone
Where it all went wrong
I traced it all along
Back here againThere was something calling me
To negativity
Dark covering me
Shrouding every scene
And Im cast inCareful, what youre feeling on the inside
You should try to remember
The good times and the high life
Are you feeling alright?Careful, when you're feeling out of your mind
You should try to remember
The strong lines in the spotlight
Till you're feeling alrightPlease answer, Im calling just to find out
If you could be here for me when I crack
The answer came, I found it buried in the trash there
I saw it stare, I saw it stare
I saw it stare, I saw it stareCareful, what youre feeling on the inside
You should try to remember

The good times and the high life
Are you feeling alright?Careful, when you're feeling out of your mind
You should try to remember
The strong lines in the spotlight
Till you're feeling alrightCareful, what youre feeling on the inside
You should try to remember
The good times and the high life
Are you feeling alright?
