## **Paris**

## **Lovebugs**

There's a place I know in paris It's where I always long to be I never feel alone in paris 'cause Someone's always waiting there for meI know all the people I've never seen before Soon I won't remember How I came 'round here anymoreThe boys keep on swinging jump and jive And the girls keep on singing staying alive And sounds keep on ringing and I will survive 'til closing time I'll be fineIt always stays the same in paris No matter if it's night or day But I must kiss someone in paris Before they ever let me stayI know all the voices I never heard before Soon I won't remember How I got out here anymoreChorus (repeat)
