# Razor Sex

## Strung Out

And now I think I know what's on your mind
Your eyes melt through me and it's no surprise
I can become you
And through your eyes
I'll watch you lie to me
Step right over me
As I fall to my kneesLike a movie star
Like kerosene
You're burning arrows sinking into me
You're my favorite ache inside
So put down that knife and come lie down with me
Step right over me
You can do anything your heart wants to do
You can do anything you wantJust like before she'll bring me down into that place
We come together and erase each other one more timeStep back as I set myself up for the kill
Shoot myself in the foot while I swallow that pill
Stand right above us to unbreak my fall
Your sex with a razor and my blood tells it allStep back as I set myself up for the kill
Shoot myself in the foot while I swallow that pill
Stand right above us to unbreak my fall
Your sex with a razor and my blood tells allLike a movie star
Like kerosene
Burning in my eyes
I can feel you now
Here I leave myself wide open now
I leave myself wide open now
It's all I even knew
