

# Simple Sound

## Oketo

Simple Siren, Spin me quicker  
Take me to nothing, nothing is something  
Turn off your mouth, Open Ears now  
Silence-Find it-Simple Sound  
These simple strings hold this heavy ground  
Look Around  
Material decay another replay focus in and out  
How can you say it's someone else? It's yourselfDon't Slip - You'll Slide  
Thick thoughts Divide  
What's wrong? What's right?  
Get tuned insideThere's an echo coming for your eyes  
Eating Sleeping Lies, Surprise-  
SurprisE  
Who are you? Who are you? WHO-  
Are you?  
Where are we? Where are we? WHERE-  
Are we?Ask yourself Questions to find out  
Change is a constant when you let it out  
Under the excess material possessive  
There's something that's seeking a real believing  
Were fooling to feel, in a mirror of movement  
It's a simple sound you have already found  
Cut the complex clown, turn around-  
Find your ground
