Double Crossed

Face to Face

Remember when we used to have it made?
It never seemed like we were on the take
But we were double crossed
Along the way
It's hard to see it any other wayYou're tilted and you're not quite true
I should've done away with you
Telling me the things you knew I wanted
But you were leaving out the best part and
Saving it for lastRemember when we used to have it made?
It never seemed like we were on the take
But we were double crossed
Along the way
It's hard to seem it any other wayJilted and when I came to
I knew I couldn't count on you
Telling me the things I thought I wanted
Were just beyond my reach but not my grasp
And I put out my hand
