

# Double Crossed

## Face to Face

Remember when we used to have it made?  
It never seemed like we were on the take  
But we were double crossed  
Along the way  
It's hard to see it any other way You're tilted and you're not quite true  
I should've done away with you  
Telling me the things you knew I wanted  
But you were leaving out the best part and  
Saving it for last Remember when we used to have it made?  
It never seemed like we were on the take  
But we were double crossed  
Along the way  
It's hard to seem it any other way Jilted and when I came to  
I knew I couldn't count on you  
Telling me the things I thought I wanted  
Were just beyond my reach but not my grasp  
And I put out my hand
