# Nuclear Winter (live)

## Sodom

Nuclear winterRun up the spiral staircase to annihilation
Deserted, neglected into the dark
Devitalized souls cripple the planet in greed
Proceed until we are absorbed in bloodCausing the premature burial of nature
With the spark to a powder keg
Pining up their toys on the shoulders of the nation
Turning death into universal heirMake us die slowly
Nuclear winter
Clouds of dust will hide the sun forever
Celebrate
Nuclear winterBlows straight into your heart
Nuclear winter
Day of tomorrow will miss you
Make you testament
Nuclear winterLuminaries become tall structures
Atmospheric cataclysm is the result
Epileptic doom of lacerated cannibals
Wrapped up the earth in a shroudEternal darkness, artificial brightness
Exclusive possession of death
Defaced skulls, effects of radiation
Mutilated past recognitionMake us die slowly
Clouds of dust will hide the sun forever
Celebrate
Blows straight into your heartNuclear winter
Day of tomorrow will miss you
Make your testament
Nuclear winterSlow death is what we can expect
Strike will have just this one effect
Condemned to capital punishment
By the nuclear sword of DamoclesDisappeared without leaving a trace
Man's dignity and grace
Infected by intruder organism
Changed into weak willed subjectsIneradicable misanthropy
We stick to nothing
Instinct of self preservation
Spreading venereal diseaseGods of war and vengeance
Commander with good conscience
Use our soul for research
In favor of nuclear technologyArrived at the end of the spiral staircase

At the doorstep to immortality
Not reached the destination of our dreams
[Incomprehensible]Decided in the struggle for existence
Life has lost, death has won the game
The length of our longing shall be the strength of our glory
Damocles proud and mighty among menMake us die slowly
Nuclear winter
Clouds of dust will hide the sun forever
Celebrate
Nuclear winterBlows straight into your heart
Nuclear winter
Day of tomorrow will miss you
Make you testament
Nuclear winter
