Love Me Again

Strawberry Alarm Clock

What are we saying for what are we praying?
Using the words we both wanna hear
What are we doing, the whole thing is proving?
Feeling the same way we always didSo, here we go once again
It's just like back when
I clearly remember the way we were then
So come back and love me againI was the one who adored you
And I waited all this time for you
But, you can't tell love what to do
It's so hard but it's trueYou used to love me completely
And I'd really love you to need me
So darling, tell me you can find the way
Find a way to love me againI've heard the stories of hearts that get broken
But if we take it slowly it won't have to be
With one step at a time heart, too fast and it all'll fall apart
I know we're survivors, but I'll speak for meEven as strong as I am, I don't think I can
Lost outside the world
I don't know just where I stand
So hurry back girl and love the boy againI was the one who adored you
And I'd wait a million years for you
But, you can't tell love where to go
This is one thing that we knowYou used to love me completely
And I'd really love you to need me
So darling, tell me you can find the way
Find a way to love me againFind any way that you can, love me again
(Over and over, I swear, I need you, need you yeah, I need you girl)
Just think it over and then, love me again
(Love me again, when I look for, I know
How do you know, how do you know, how do you know?)Find any way that you can, love me again
(Find any way that you can, love me again)
('Cause it is all I ask for right now [Incomprehensible])
Just think it over and then, love me again
(Honey, love me again [Incomprehensible])
Find any way that you can, love me again
(Any way that you can, love me again)
