

Diamond Eyes

[RISHLOO](#)

We are not machines
we are not machines programmed, encoded
we are so much more, we are so much more oh the lights
burning like fireflies caught in a web
electricity hums in our heads
we're overwhelmingly fearless when diamond eyes light up the sky, I promise you that we can change the world
when diamond eyes light up the sky, I promise you that we can change...we are not your routines
we are not your routines despite what you've told us
we are all one, we are all one...
