

# A Wisdoms Breed

## Darkane

As we walk through the valley of transparent souls  
We have to find the knowledge of sin  
So we will fear the light as the darkness  
Hate lies beyond the fall of any angelsSearch the lies in the insane sanity  
And try to invent hope for those who have denied  
Never seen, never touched the wisdom of pure painLook into the anguish of faith  
And see the helpless face of reality  
Take a look and see the time foreverThrough endless sorrow we have to wander  
Drift around in a chaos of regret  
We're being slain in the true circles of hellSearch the lies in the insane sanity  
And try to invent hope for those who have denied  
Never seen, never touched the wisdom of pure painDon't compare your souls to mine  
Use your dark powers from deep insideLet the hate guide our minds to total control  
A world full of souls  
That have failed to complete their dreams  
Anxiety, the breeding of deranged eruditionSearch the lies in the insane sanity  
And try to invent hope for those who have denied  
Never seen, never touched the wisdom of pure painThe eternal battle between good and evil  
Saint and sinner
