Migration

Mark Salling

Pardon me
but can I please just ask a stupid question
what is living for?
honestly I'm partially consumed by indirection
and I find I'm wanting more
metaphors and dinosaurs led to this proclamation
you can't change history
until then let's just pretend it's good to be proactive
but I'm still dreaming
just because hopefullysomewhere something is waiting for us
I will say it over and over
I don't care what you believe in
just hang out and be coolWhen birds decide which way to fly
it's not like it's an issue
it happens naturally
just like them I tend to move
in similar migration
we can still agree
just as long as when you're wrong
nobody is afflicted
all your dreams come truemeet me in the street so I can offer you a high-five
cause you're my friend
and I know you feel it toosomewhere something is waiting for us
I will say it over and over
I don't care what you believe in
just hang out and be coolyou can, you can follow me
to a final destination
only whatever you need
to achieve your salvation
in the possibility
we can find a higher power
and finally we'll see
the fog is the same body(?)somewhere something is waiting for us
I will say it over and over
I don't care what you believe in
just hang out and be cool
just hang out and be cool
just hang out and be cool
