Paper Tigers

The Chameleons

It's in the atmosphere we breathe tonight
It's in the people that we meet and in your eyes
And just like every other fool out there
We don't think were so unique, such special freaks
It's in every single one of us
Every single one of us
Looking for a city
Hoping for a second shot
Every single one of us
Every single one of us
It's in every single one of us
Every single one of us
Looking for a city
Hoping for a second shot

Every single one of us
Every single one of us
I see the world light through a looking glass
I see the people walk by walk by
Like paper tigers roaming in the street
They stare right through me when we meet
It's in every single one of us
Every single one of us
Looking for a city
Hoping for a second shot
Every single one of us
Every single one of us
...
