

# Morphing Into Primal

## Infektline

Detonation  
Fireworks and alchemy  
Genes spliced and triggered  
    into the future  
    and her organic cave

Seismorgasmic omnipotence  
scenes of magma in my eyes  
Eruption stones my system

I owe this to the animal inside  
and the stiffness that blocks out the daylight  
    Morphing into primal

I'll cover every particle  
    from there to Andromeda  
    not forgetting a single location  
        from the throat of Ibis  
    to the co-ordinate of Matterhorn

My shot is genesis and catharsis  
Penetratonaut in a cosmology of lust

Suck this subterranean creature out  
and show it proudly to the house of heaven  
    With one slight wave of my hand  
        star dissolves

Dissolve my brain  
    Block my lungs  
    I'll die from fever tomorrow  
    when locked in sych a perfected "now"
