

I Saw You

[Josh Kelley](#)

I, I saw you
I couldn't think of what to say
So, I stumbled to the bar
And I just froze when I saw your faceI didn't know just what to say to you
And didn't know just who to blame
But I didn't want to face the days alone
For the night I didn't get your nameSo I, I tried to slow
And whispered softly in your ear
Then I stumbled to your arms
To set the stage for what I fearedI didn't know just what to say to you
And didn't know just who to blame
But I didn't want to face the days alone
For the night I didn't get your nameFade into my life
Never getting it right
Risky fantasies
Made for what you see insideI didn't know just what to say to you
And didn't know just who to blame
But I didn't want to face the days alone
For the night I didn't get your nameI didn't know just what to say to you
And you didn't know just who to blame
But I didn't want to face the days alone
For the night I didn't get your name
Get your name, get your name, get your name, oh yeah
