

# Rose Coloured Glasses

## Blue Rodeo

She sees the world thru rose coloured glasses,  
Painted skys and dreams of romances  
I see a world that's tired and scared  
Of living on the edge too long  
Where does she get off telling me  
That love could save us all  
Save us all She takes my hand and leads me to another time  
No matter where I am,  
It's always good in her eyes  
In the cool of the evening blue  
I feel so tired and alone  
Where does she get off telling me  
That love could save us all  
Save us all Chorus:  
And it's day after day  
I keep hanging around, can you tell me why  
Night after night  
And I know I should leave but there's somethin  
In those eyes  
That keeps me hanging on  
I'm hypnotized  
And it breaks my heart and I don't know why. Repeat Chorus
