

# Into The Wild

## Boy

Or I could follow you  
Into the wild  
You'd know your way in the woods  
You'd read the wind and find places to hide  
We'd live with the animals  
We'd play by the fire  
And maybe from time to time  
Under white starry skies  
I'd dream of lightbulbs  
And hands that kept me warm in another life  
My heart it races  
And my mind cannot catch up  
It lives in two places  
It runs through doors that should be shut  
Or I could stay right here  
Watch you from behind  
Wave 'til your ship's left my harbor  
Embrace the edges of love in my beautiful life  
I'd play with the animals  
I'd sit by the fire  
And maybe from time to time  
I'd spot your face in the flames when I get tired  
My heart it races  
And my mind cannot catch up  
It's all over two places  
It runs through doors that should be shut  
My head's asking questions  
My heart's a determined dancer  
So when the music is over  
Will I finally get my answer?
