

Can't You See

Lemar

Can't you see I love you, baby? Gotta

(Lemar, Styles P, the Ghost, let's go) Since back in the day, we've been close friends

You would call on me tellin' me your problems

I'd been feelin' things, things I never said

When you said that you were in love, wish it was me instead I'd treat you like an angel, he treats you like a fool

When you were hurtin', baby, I was broken too

(I can't go on this way)

And I can't go on, I need you, baby Tired of being the shoulder you lean on

Wanna be the one you hold on to

More than just a friend, let me be your everything Wish I knew the way to make you

See that I've fallen in love with you, oh

(Can't you see I love you, baby? Gotta) If I sit you down, tell you what I'm going through

Will you leave him, will it be too much for you?

Don't wanna be an addition to your situation

I never wanna be a complication But if I see you cry, I'm stepping in

I can't keep watching you get your heart broken, hey

(I can't go on this way) Tired of being the shoulder you lean on

Wanna be the one you hold on to

More than just a friend, let me be your everything Wish I knew the way to make you

See that I've fallen in love with you, oh

(Can't you see I love you, baby? Gotta)

Let's go, Lemar, yeah I ain't never said that I loved you

More than the friend that put nothin' above you

And I could be more than the shoulder you lean on

I could be your king, little lady, you'd be gettin' your queen on It hurt me every time I seen him hurt you

Thinkin' 'bout these feelings got me runnin' in circles

(I can't go on this way)

I love your mind, body and soul and even your perfume Tired of being the shoulder you lean on

Wanna be the one you hold on to

More than just a friend, let me be your everything Wish I knew the way to make you

See that I've fallen in love with you, oh

(Can't you see I love you, baby? Gotta) Tired of being the shoulder you lean on

Wanna be the one you hold on to

More than just a friend, let me be your everything Wish I knew the way to make you

See that I've fallen in love with you, oh

(Can't you see I love you, baby? Gotta) Whenever you're down, a mess

I will be there, baby, I will lift you up when

When there's trouble, girl Look over your shoulders, honey

When there's trouble, you can count on me, oh

(Can't you see I love you, baby?)
