Vampire Heart

Him

You can't escape the wrath of my heart
Beating to your funeral song
All faith is lost for hell regained
In the dust of the wrath of shame
Let me wake in the sun of my heart before
Lead you along this path in the dark
Where I belong until I feel your warmth
Hold me like you held onto life
When all fears came alive and entombed me
And love me like you loved the sun
Scorching the blood in my vampire heart
I'll be the thorns in every wound
You will send my hope
I am the nightmare waking you up
From the dream of the dream of love
Let me be indisposed as heaven's gates hold
Gave you my soul, started to love
I'm waiting for your kisses to take me back home
Hold me like you held onto life
When all fears came alive and entombed me
And love me like you loved the sun
Scorching the blood in my vampire heart
Hold me like you held onto life
When all fears came alive and entombed me
Love me like you loved the sun
Scorching the blood in my vampire heart
Hold me like you held onto life
When all fears came alive and entombed me, my vampire heart
Love me like you loved the sun
Scorching the blood in my vampire heart my vampire heart
