

# Thank You

**Jay-Z**

Thank you, thank you, thank you, please hold your applause  
'Fore I just apply logic keys, keys open doors  
Now I'm balcony, opera, black tux, binoculars, black lux  
Stop it, I shouldn't be so popularName keep poppin' up, face keep poppin' up  
On the tube, I'm just watching Paki box 'em up  
How would I know HBO would got a shot of us?  
Sittin' so close that we almost got snot on usPlease don't bow in my presence, how am I a legend?  
I just got 10 number 1 albums, maybe now 11  
More hits than a 'Now 11'  
That's no reason to treat me like I'm from heavenHeaven knows that I've made my mistakes  
That God would've died while I say my grace  
Who would've thought that by making birds migrate  
For the winter, I might fly all summer, might I say
