

# Alpha (Radio Single)

## Periphery

It's always better on the other side of it  
Wanting what you never have  
It is a goddamn broken state of mind  
Here, the one that we've been living in  
It's never greener inside the mess we're in  
Wanting what you never have  
The less we all contend, the more we throw away  
What little time we have left to grow  
Separate mind from hate, what do we have now?  
Yeah to live well, a life  
What little time we have  
Stop bleeding on the inside  
We are alive  
And it's more than enough to paint the walls in our word  
Can we show the ones who are blind?  
It's envy eating away at the core of us  
Wanting what you never have  
And isn't it the point of living to breathe  
Knowing this is all we get?  
It's never greener inside the mess we're in  
Wanting what you never have  
The less we all contend, the more we throw away  
What little time we have left to grow  
Separate mind from hate, what do we have now?  
Yeah to live well, a life  
What little time we have  
Stop bleeding on the inside  
We are alive  
And it's more than enough to paint the walls in our blood  
Can we show the ones who are blind?  
Stop bleeding on the inside  
We are alive  
And it's more than enough to paint the walls in our word  
Can we show the ones who are blind?  
Can we show the ones who are blind?  
Stop bleeding on the inside  
We are alive  
And it's more than enough to paint the walls in our blood  
Can we show the ones who are blind?  
Stop bleeding on the inside  
We are alive  
And it's more than enough to paint the walls in our word  
Can we show the ones who are blind?  
Fly past the withered trees  
Ascend to holy air and breathe  
Fly past the withered trees  
Ascend to holy air and breathe  
This want is menacing  
It will not leave us be  
Can we purge this?

The bastard in our brain will chew until it bleeds  
How did we get like this?How did we get like this?  
Can we purge this?Step out in the rain  
Feel life in our veins  
Step out in the rain  
Feel life in our veinsHow did we get like this?  
Can we purge this?  
The bastard in our brain will chew until it bleeds  
How did we get like this?
