To Be Loved

Joan as Police Woman

Im so happy to be loved
Throw me down and light me there
Cause Im an awful mess I havent careWere eternity, oh I feel the sigh on
Every breath thats met us here
This night dreams fantastic
And its ours my dear
And you love me tooHow on earth could you have found me
Huddled under grapes of wrath
I will never know but forever ask
How I got so luckyAll this time proceeding
Silent in processional
The words they escape me
Through my singing cage
Of how I love you tooIts safe to be alone and be lonely
But I found a gun with no safety
And I am going to shoot down
My ghost town completely
Cause I know theres a place for us
I made it, I made itI am through with sharing all my love
I have outgrown crowding up my house
When you found me I could not be loved
But then I found me and Im happy to be loved
