Miracles

Blessid Union Of Souls

You ever seen a brother or sister who could cure a disease I hadn't but I wanted to Show the world that nothing's impossible if they can believe They're gonna see a miracle I didn't know what to do So I went running to you To find that cure Now I know for sure... I'm done looking around I finally figured it out It's more than metaphysical You got me up from down Faith has shattered my doubts I believe in miracles I knew what I wanted to do but just like gravity's pull I always did the opposite Life was a meaningless party I started to fall into a bottomless hole But then I got a miracle Some people don't have a clue If all of this could be true But take a look at me I was blind but now I see

I'm done looking around
I finally figured it out
It's more than metaphysical
You got me up from down
Faith has shattered my doubts
I believe in miracles
There's something that's missing
If we can't recognize
That our own existence
Is the miracle before our eyes
I'm done looking around
I finally figured it out
It's more than metaphysical
You got me up from down
Faith has shattered my doubts

I believe in miracles
I'm done looking around
I finally figured it out
It's more than metaphysical
You got me up from down
Faith has shattered my doubts
I believe in miracles
It's more than metaphysical
