

Can U Deliver

Armored Saint

Alright Can U deliver?
I'm overlooking you
Laying out the question
Think that you'll pull through Do you know what love means?
A push and then a shove
Don't put the thought around me
I'm coming from above yeah Me, I'm just a young soul looking
For a good time tonight
You want it to last forever
I don't have that in sight no Seems to be the same old story
You get 'em once and they fall at your knees
I wish that I would've known better
Before I played the dirty deed Not romance to me, it's just the fever
Here's your chance to please
Can U deliver? Can U deliver?
Can U deliver? Can U deliver? It's a shame to take your dreams
And chain them to reality
I don't listen anymore
Action is what I need Not romance to me it's just the fever
Here's your chance to please
Can U deliver? Can U deliver?
Can U deliver? Can U deliver?
Can U deliver? Can U deliver?
Can U deliver? Can U deliver? Deliver to me
