

# See the Same Way

Bruce Hornsby

There was a little girl, picked up a doll, oh so white as snow  
Said, "This is me as I really am"  
Same little girl, picked up a doll, looked just like her  
And threw it away in the garbage, the garbage can, hey  
One man in a courtroom with a grim-faced stare  
A sea of armchair experts judging what's said  
One man saw another man, that could've been him  
One man and a woman saw nothing but red, red, red  
You're looking at a picture, I'm looking at it too  
Do you see what I see today, hey  
Let's talk about the difference, find out what's in the way  
Open our eyes, see the same, see the same way, hey now  
One man saw a healer doing such good, good things  
One man saw a sinner by the holy sea  
Well Jesus and the pharisees didn't see eye to eye  
But the man on the shore saw so clearly  
You're looking at a picture, I'm looking at it too  
Do you see what I see today, hey  
Let's talk about the difference, find out what's in the way  
Open our eyes, see the same, see the same way, hey now  
I want to be at the meeting, well I want to be in that number  
When we all see, see the same, see the same way  
One man saw a million men standing in peaceful grace  
One man saw nobody missing work  
Telling lots of bad jokes might just make you feel good  
But you never know who you, who you hurt with your words  
You're looking at a picture, I'm looking at it too  
Do you see what I see today, hey  
Let's talk about the difference, find out what's in the way  
Open our eyes, see the same, see the same way, hey now  
There was a man playing G.I. Joe, way back there in the  
woods  
In training for the coming of the promised war  
Seeing all conspiracy, needs somebody to blame  
If only he could open up, love a little more  
You're looking at a picture, I'm looking at it too  
Do you see what I see today, hey  
Let's talk about the difference, find out what's in the way  
Open our eyes, see the same, see the same way, hey now  
I want to be at the meeting, well I want to be in that number  
When we all see, see the same, see the same way
