

I Found You

[Anthony Evans](#)

You never know what could open up your eyes
Sometimes the truth comes in disguise
So close what you need most
Is hard for you to see
Unexpected but if you let it
It's everything you need

I found hope I found love
I found strength to rise above
A beautiful fire that burned though
Everything I thought I knew
When I found you

Beauty rises from the dust
Heartache can teach us how to love
In the dark night a trace of light
Shines so easily
When you broke through like a bright blue sky
You changed the way I sing

I found hope I found love
I found strength to rise above
A beautiful fire that burned though
Everything I thought I knew
When I found you

Anytime my heart gives into doubt
I'll remember when
I'll remember how I found you
