

Start the Fire

No Doubt

Go on and baby, get the lighter
We're gonna start the fireThe army of words in me
Silent the soldier weeps
Lying here back to back
Waiting for you to reactAnd sometimes, all I need is a good push
Roll over and whisper some goodness
Go on baby, you be the hero
Now, can we go back to zero?Go on and get the lighter
We're gonna need some fire
Let's get a little higher
The battlefield is tiredThen why all, all that?
Go on and baby get the lighter
We're gonna start the fireJust come here and cuddle up
I feel a little rough
I missed you in my sleep
Are you still mad at me?The moon must have mended my bad mood
Come kiss me the way you're meant to
Last night I was just playing
Let's put it all away andGo on and get the lighter
We're gonna need some fire
Let's get a little higher
The battlefield is tiredThen why all, all that?
Go on and baby get the lighter
We're gonna start the fireGo on and baby get the lighter
We're gonna start the fire
Go on and baby get the lighter
We're gonna start the fire, start the fireMurder!Climb in, love me, climb in and love me
Go on now, baby, you get itHad quite a heavy night
So girl, look it all up and bright
The most stubborn girl around
You really know how to bring me downOne more famous night to remember
Let's laugh at my silly temper
Now let's spend the morning sweetly
Get over here now and complete meGo on and get the lighter
We're gonna need some fire
Let's get a little higher
The battlefield is tiredThen why all, all that?
Go on and baby get the lighter
We're gonna start the fire

Go on and baby get the lighter
We're gonna start the fireGo on and baby get the lighter
We're gonna start the fire
Go on and baby get the lighter
We're gonna start the fireWow
Go on now, baby, you get it
Wow
