Grail

Sevin

I've been searching oh I fear
For what seems like a thousand years
Only to find that I'm losing my mind
I've been standing to the side
A blackened soul as my guide
Only to see there's a price to be free
You can cast a magic spell
Or pull the sword from the the stone
Until you find the Grail that you've been looking for
You'll always be alone
Where is this Grail I've been searching for?
So many years since you've been gone
On all the roads I have traveled on

Where is this grail I've been searching for?
I have run so far away from the stench of decay
Only to learn I should never have turned
I'm completely at fault, to a pillar of salt
I've been reduced feel the pull of the noose
You can cast a magic spell
Or pull the sword from the the stone
Until you find the Grail that you've been looking for
You'll always be alone
Where is this Grail I've been searching for?
So many years since you've been gone
On all the roads I have traveled on
Where is this grail I've been searching for?
