

In My Veins

Exilia

I don't know where I belong
Where are the angels when everything's wrong?
My eyes are looking above (...) the sky has adored

I don't know where you have gone
You'll know that I need a reason for all
Don't know if you're next to God
but I feel you here in my blood

In my veins
In my heart
your life full shine again
your life full shine again

Through my veins
in my heart
your life full shine again
Your life full shine again... from me!

I can feel the void in this world
You were the best part I used to adore
You shown me the feeling (torn?)
It's just a way to be reborn

In my veins
In my heart
your life full shine again
your life full shine again

From my veins
In my heart
your life full shine again
your life full shine again

Life will shine
Life will shine... again! again!

Life will shine
Life will shine... again! again!

In my veins
In my heart
your life full shine again
your life full shine again... from me.

I don't know where I belong...
